

EventChain Shutting Down at Midnight June 29, 2021

June 2021

Dear Organizer,

EventChain was founded with the vision to provide event creators with a fair and trustworthy alternative for event ticketing. Our first 2 years were an exciting time as we connected with and served event creators around the world. In that time we saw promising interest and received a vast amount of positive feedback about our service and our mission to create an event ticketing platform that fans, artists and event creators can trust.

2020 was shaping to be a breakthrough year for us as our platform features matured to support a wide variety of event creator needs. That all came to a crashing halt with the COVID pandemic's suspension of all live events. It is with sincere regret that we inform you that we have succumb to the pressures of the past 15 months and the uncertainty of the future of live events and will be shutting down our service as of midnight June 29, 2021.

If you need to export any reports related to past events, you should [log in](#) to your account to export any reports prior to midnight June 29, 2021. If you need help with exporting your reports, please contact us at supportevc@eventchain.io.

Sincerely,

Ashton Addison

CEO

EventChain SmartTicket Ltd.
